Subject: Application for Lead Data Engineer (Requisition ID: R0230263)

Dear Ralley,

I am writing to express my interest in the Lead Data Engineer position at Booz Allen Hamilton. With extensive experience in designing and optimizing scalable data solutions, I bring a strong technical foundation combined with leadership skills that align perfectly with your mission to leverage data as a secure, strategic asset.

In my previous role as a Data operation Engineer, I have successfully architected and maintained enterprise-grade data pipelines across cloud and distributed environments. My expertise spans ETL, Data integration, Cloud and On-premises related various RDS services should help the project. I have led cross-functional teams to deliver high-quality, secure, and reliable data solutions that empower analytics and mission-critical decision-making.

Key highlights of my experience include:

- 5+ years of building and maintaining data pipelines and warehouse implementation of ETL workflows.
- Hands-on experience with cloud-native architectures using CI/CD pipelines and observation tools.
- Strong ability to set engineering standards and drive innovation while fostering collaboration across multidisciplinary teams.

I am a new employee at Booz Allen and do have the ability to apply for TS/SCI clearance. I am willing to obtain Security+ certification within the required timeframe further position me as a strong candidate for this role.

I would welcome the opportunity to contribute my skills and leadership data engineering initiatives. Thank you for considering my application. I look forward to the possibility of discussing how my experience can support your team's success.

Sincerely,
Milind Chokshi
