

Milind Chokshi
Level: Data Engineer/Operation Lead
Email: Chokshi_milind@bah.com
Cell: (757) 763-0143

Clearance: Clearance Eligible, Public Trust
Residence: Virginia
Willing to relocate: Yes
% Willing to Travel: 100%

EXPERIENCE SUMMARY

I am seasoned IT leader with over 20 years of experience in enterprise-scale digital transformation, specializing in cloud computing, data engineering, and application architecture. I have a proven track record in implementing advanced solutions such as Microsoft Azure Fabric (Databricks-based Spark and Delta Lake platforms), Power BI integration, DataOps frameworks, and CI/CD pipelines, acquiring and consuming the real-time data using Ignition SCADA real-time data acquisition system with an emphasis on automation and scalability. My expertise spans architecting cloud-native solutions, designing ETL/ELT processes, and driving data governance initiatives using tools like Manta, BigID, and Erwin for lineage, privacy, and compliance. I excel at aligning technology with business goals, mentoring teams, and fostering agile delivery through modern DevOps practices.

COMPETENCIES

• Data Engineer/Architect (7 yrs)	• Cloud Solution Engineer (5 yrs)
• Database Design and Development (10 yrs)	• Cloud/Systems Integration (10 yrs)
• Data Governance (4 yrs)	• Data Integration and Analyst (5 yrs)
• Database Administration (5 yrs)	• Agile Development (10 yrs)
• Portal Development (5 yrs)	• Web Software Development (5 yrs)

WHITE PAPERS/CERTIFICATIONS

- AWS Certified Cloud Practitioner (Expected Feb 26)
- Building Resilient Streaming Systems
- Big Data and Machine Learning Fundamentals
- Complete Guide to Databricks for Data Engineering
- Leveraging Unstructured Data with Cloud

SUMMARY OF SKILLS, TOOLS, AND TECHNOLOGIES:

Cloud Platform: Microsoft Azure, Google, Ignition (SCADA), Amazon Web Service (AWS)

Cloud Data Platform: Microsoft Fabric (Databricks related Spark//Delta Lake), Azure Data Factory

CI/CD Tools: Jenkins, Azure DevOps, Kubernetes

Data Governance: Manta, Brigid, Erwin Data Intelligence, Erwin Data Quality

Code Management: Enterprise Github, Github.com, SharePoint

Planning Tools: JIRA, Version One

Statistical Tools and Language: R-Studio, RS Connect Server, Shiny Applications

Visualization Tool: Power BI

Database Knowledge: ORACLE with PL/SQL programming, Microsoft Access, SQL Server

Programming Languages: Python, R

Operating System: Windows, Linux

EXPERIENCE DETAILS

Senior Data Operation Engineering Manager/Architect, PRA Group Inc, VA

2017-2025

- Implemented data integration, movement, transformation, Lakehouse and warehouse architectures, notebook-based development, role/group-based access controls, data pipeline creation, deployment pipelines, Git integration, configuration, and optimization
- Designed and architected data products to ensure ease of access for both internal and external business users, including technical teams such as BI developers, data engineers, data analysts, data scientists, and ML engineers
- Worked with event-driven and trigger-based data services, as well as batch and stream replication systems
- Established a Data Governance program to enhance data lineage, dictionary, business glossary, quality, and cataloging for both transitional and restful data

- Developed PySpark notebook-based data pipelines to process structured and unstructured data using Lakehouse and warehouse models within the One Lake cloud environment
- Developed the Azure cloud platform using multiple Data Factory instances, DevOps pipelines
- Administered and implemented GitHub integration for repository versioning across multiple organizations, including project management, issue tracking, branch organization, and wiki documentation
- Streamlined data representation and transformation using GitHub and Jenkins CI/CD pipelines, delivering Power BI and R-based reports for data visualization
- Led the development, maintenance, and deployment of machine learning models using Azure Machine Learning Studio across development, testing, and production environments
- Utilized containerization and orchestration technologies, applying DevOps, DataOps, and MLOps principles for scalable and efficient operations

Significant Achievements (Approx project cost \$5 million):

Strategic and hands-on leader with deep expertise in Azure, and modern data engineering technologies. Spearheaded enterprise-scale data migration projects (50+ TB) from on-prem to cloud, architecting resilient Lakehouse and warehouse ecosystems with 20% cost savings

IT Product Lead/Manager, TE Connectivity, Virginia

2015-2017

- Operationalize cross-platform industrial application platform used for SCADA and MES
- Connects disparate field devices and databases using OPC UA, MQTT, and SQL to enable real-time data visualization, alarming, and control using Python based tools
- Created project plans and managed stakeholder requirements from engineering, IT, and business needs
- Coordinated vendors to upgrade current systems, purchase equipment, and maintain existing solutions.
- Implemented physical infrastructure from the database, network, and software installation
- Built data warehouse with business intelligence to create reports, charts, and data analysis in SQL Server
- Worked with Statement of Work (SOW), Master Service Agreement (MSA), and Project Charter

Significant Achievements (Approx project cost \$20 million):

Implemented the complete database and IT infrastructure of around \$1.2 million and helped with successful project execution to eliminate the manual data collection, storage and administration, and analysis phases

Senior Database System Analyst

2011- 2015

Old Dominion University, Norfolk

- Designed and worked on Oracle schemas, table partitions, materialized views and indexes
- Corrected and compiled code into test, pre-production, and production environment
- Administered Oracle Database Administrator tasks such as RMAN backup and restoration, monitoring, users and role management, performance improvement, and cloning
- Supported and performed the database installation, implementation deployment, upgrades, and maintenance of Oracle based ERP systems
- Developed and configured the Oracle workflow application related to intra-department request flows

Portal Administrator/Developer, Virginia

2001-2011

- Guided and managed portal team members for Java based web-portal technical implementation and manage coordination among various departments such as network, database administrator, Banner Student application, security, Unix and Windows server, and LDAP administrator
- Created applications using servlets, JavaServer Pages, and Java-based technologies
- Developed websites for various educational departments, organization, and institutes within the University (<http://www.odu.edu>)

EDUCATION

MS - Computer Simulation, and MBA, Old Dominion University

BS - Electrical Engineering, BVM Engineering College, SP University
