Dear Anthony Ngo,

Subject: Application for Data Engineer Position (R0229861)

Dear Hiring Manager,

I am excited to apply for the Data Engineer position at Booz Allen Hamilton. With extensive experience in designing and implementing scalable data solutions, I am passionate about leveraging data to drive mission-critical insights.

In my previous role as a Data Operation Engineering Lead, I have successfully developed and maintained data warehouses and scalable data stores that enable advanced analytics and reporting. My expertise includes:

- Data Engineering & ETL Development: Over 5 years of experience building robust ETL/ELT workflows and pipelines to process structured and unstructured data efficiently.
- SQL & Backend Testing: Strong proficiency in SQL for data retrieval, transformation, and validation, ensuring accuracy and reliability in production environments.
- Cloud & Big Data Technologies: Hands-on experience with Microsoft Fabric (next version of Azure Synapse Analytics and Azure Data Factory), and distributed computing tools such as Spark and Databricks, enabling high-performance data processing at scale.
- Cross-functional Collaboration: Proven ability to work in agile, multi-disciplinary teams to deliver innovative solutions that meet client requirements.

I would welcome the chance to bring my technical expertise and collaborative mindset to your team. Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experience can contribute to Booz Allen's continued success.

Sincerely,
Milind Chokshi
