Subject: Application for Data Engineer III Position at the U.S. Consumer Product Safety Commission

Dear James,

I am writing to express my interest in the Data Engineer III position supporting Booz Allen Hamilton's work with the U.S. Consumer Product Safety Commission (CPSC). The mission of strengthening national product safety through modern analytics, machine learning, and cloud-native architecture is deeply meaningful to me.

My experience includes building scalable ETL and ELT pipelines in Azure using Python, deploying data workflows that support machine-learning model training, and implementing strong data validation and schema-enforcement practices. I have worked with Azure Data Factory, Data Lake Storage, Azure SQL, Microsoft Fabric, and open-source frameworks such as Pandas and NumPy. These capabilities position me well to support the development of secure, flexible, analytics-ready data systems aligned with the job requirements.

I am particularly drawn to the project's emphasis on governance, metadata management, and training, which reflects a commitment not only to sound technology practices but also to empowering people and strengthening public trust. I would welcome the opportunity to contribute my skills to such a meaningful effort.

Thank you for your time and consideration.

Sincerely,

Milind Chokshi
