Subject: Application for Technical Implementation Lead (Job ID: R0233597)

Dear Kirsten,

I am writing to express my interest in the Technical Implementation Lead position at Booz Allen Hamilton. With over 7 years of experience in technical design, solution architecture, and cloud-based implementations, I bring a proven ability to lead technical teams and deliver secure, scalable solutions that align with organizational goals.

In my previous role as a Senior Data Operation Engineer/Architect, I have successfully architected and deployed solutions in cloud and on-premises environments, leveraging modern DevOps practices and automation tools such as GitHub and CI/CD pipelines. My expertise spans in python enabling me to design and implement robust applications that adhere to engineering and governance standards. Additionally, I have hands-on experience with Linux/Unix systems, and shell scripting, ensuring operational efficiency and reliability.

My background in optimizing cloud cost management and implementing governance frameworks aligns well with Public Health project. Furthermore, my familiarity with Gen-AI tools like GitHub Copilot position me to drive innovation and efficiency in solution delivery.

Beyond technical proficiency, I pride myself on my ability to lead cross-functional teams, foster collaboration, and deliver solutions that exceed client expectations.

I am eager to bring my skills and passion for cloud technology to project and help transform Public Health through modern, secure, and scalable solutions. Thank you for considering my application. I look forward to the opportunity to discuss how my experience and vision align with your team's goals.

Sincerely,

Milind Chokshi
